Intro

For a long time, English and German Shadowrun books were inconsistent with each other, because FanPro liked to do their own thing with setting and equipment. And at least as far as equipment goes they were not particularly good at it, as the German extras introduced massive power creep (or so I have been told).

With Pegasus Spiele taking over the German Shadowrun license, this was supposed to change for the better, because now CGL have to approve whatever whatever Pegasus want to change or add to a German book.

And yet, the English and German publications are again drifting apart – not because there is no coordination taking place, but because CGL do nothing with the stuff they receive and endorse. For reasons unknown, CGL choose to withhold both errata and additional content from their customers.

This file lists all extra equipment included in the German editions of *Arsenal* (*Arsenal 2070*) and *Augmentation* (*Bodytech*). As stated above, this gear has been officially approved for publication by CGL, and as such can safely be considered canon.

All descriptions of game mechanics are given as complete as possible, however fluff information is only paraphrased as far as it is relevant for actual gameplay. Not just due to concerns over copyrights, but also to preserve some extra value for those who bought the books, or will buy a potential future release by CGL containing all this (assuming they ever get their act together).

Credits & Legal

All information in this document is based on the books *Arsenal 2070* (ISBN 978-3939794769) and *Bodytech* (ISBN 978-3939794776) released by Pegasus Spiele GmbH. This document itself however is a totally non-official project, which is not endorsed by either Pegasus or Catalyst. All information in the following chapters was produced by Pegasus and their hard-working freelancers, hence I cannot take credit for anything, except compiling their work into this document.

Or more formally, in the words of Topps' standard disclaimer:

Arsenal

Melee Weapons

Athame: A ritual dagger, popular among followers of witchcraft and Neo-Paganism.

Injection Dagger: Can be loaded with one dose of any chemical, which is injected into the target on a successful hit. Artwork

Sword Cane: A sword or épée hidden inside an ordinary cane, popular among British aristrocrats. No rules for discerning the true nature of this item given.

Name	Reach	Damage	AP	Avail	Price
Athame	–	(STR/2 + 1)P	-	9R	500 ¥
Injection Dagger	–	(STR/2 + 1)P	-1	5R	750 ¥
Sword Cane	–	(STR/2 + 2)P	-1	11R	750 ¥

Arrow Tips

Payload Tip: Contains a chemical (to be purchased seperately) which is spread upon impact. Use rules for Splash Grenades (→ *Arsenal*), but with a radius of 5 m.

Name	Damage	AP	Avail	Price
Payload Tip	(-2)S	+2	8R	65 ¥

Firearms

Light Pistols
AS-113o "Assassin": Arrow pistol which fires using a silent spring mechanism. Both the weapon and its ammunition are made from plaststeel and contain no chemical propellants, hence they cannot be detected by MAD scanners or Chemsniffers. Ammunition costs 9 ¥ per arrow with the same Availability as the weapon itself and uses the rules for injection bolts (→ *SR4A*).

Heavy Pistols
Enfield Merlin: Heavy revolver, comes with an integrated Smartgun System and Ammo Skip System (→ *Arsenal*). Artwork

Zastava CZ49: Former service pistol in various East European countries. All production and shipment records of the manufacturer were destroyed in the Crash 2.0. Accordingly, it is nearly impossible to trace back an individual CZ49, making the it quite popular among European criminals and shadowrunners,. Artwork

Assault Rifles
AK-127: An AK-97 with two drum magazines holding 50 or 100 rounds each. Only ammunition from one drum is used at any time, however switching to the other drum only takes a Simple Action (Free Action if using a Smartlink). For purposes of Concealability, the AK-127 is treated as having the Extended Clip modification, meaning a +2 modifier when using the 50 round drums and +4 for the 100 round drums. Artwork

Shotguns
Altmayr SP: A shotgun pistol. Treat as a shotgun with the Barrel Reduction mod (→ *Arsenal*), i.e. -20% range, -2 Concealability, and no narrow spread.

Medium Machine Guns
Ruhrmetall R506 Balmung: A Gatling gun, accordingly it uses the rules for those (→ *Arsenal*). The barrels need one Simple Action to spin up to firing speed, and produce a characteristic and audible sound while doing so.

Name	Damage	AP	Mode	RC	Ammo	Avail	Price
AS-113o "Assassin"	3P	–	SA	–	6(m)	9R	500 ¥
Enfield Merlin	5P	-1	SA	–	6(cy)	8R	625 ¥
Zastava CZ49	5P	-1	SA	–	10(c)	4R	250 ¥
AK-127	6P	-1	SA/BF/FA	–	2x50(d) or 2x100(d)	12F	3,250 ¥

*: Gatling gun

Armor and Clothing

A-J – Anielski-Joop (Berlin & Munich)

A relatively young company owned by long-established fashion manufacturer Joop and the Russian industrialist family Anielski, has become synonymous with high-quality (and high-priced) protection clothing.

reconquista: Made for Neo-Victorian looks – long, double-breasted frock coats with high collars, heavy leather boots, metal ornaments...

All coats are made from special cloth which counts as having Rating 3 Chemical Protection. Artwork

dressCODE (Munich)

The "in" brand for models, upstarts and corporate off-spring.

CYBERPIRATE: Tron-like look with protectors on various body parts and the ability to display images from a commlink on the clothes. Apart from this, the jackets also offer Rating 2 Chemical Protection.

Reingold – zeitloS Klassisch (Düsseldorf)

The "timeleSS classic" brand was founded by a former H&K employee, accordingly it emphasizes protection as well as looks.

Aurora: Elegant, slightly conservative clothing made from fine but nevertheless bulletproof cloth. Sold exclusively in white, black, and wine red, with the typical golden seams.

Military Armor

Saeder-Krupp Myrmidon: Heavy armor for SK's commando units. Standard tactic is to employ troops wearing this armor after softening the enemy positions with a variety of chemical weapons. The armor is equipped with a full Chemical Seal and Rating 3 Thermal Damping; the helmet with an Olfactory Scanner and Ultrasound Sensor. Artwork

As usual, subitems of entries marked with (c) may be combined with each other, except for those marked with *

Survival Gear

Proteus Monosled: An underwater sled which can transport a diver with up to 30 kg of equipment at a speed of 15 m/Turn. The batteries last for 4 hours and can be reloaded in two hours. Spare batteries cost cost 150 ¥ and can be exchanged in 5 minutes.

Name	Avail	Price
Proteus Monosled	8	2,500 ¥

Odds & Ends

Powerboard: High-tech skateboard which uses the rules and price for Inline Skates (→ *Arsenal*). To ride this board, a character needs to either wear special shoes which attach to the board (50 ¥), or modify existing footwear with the required notches (35 ¥ per pair). Artwork

Vehicles and Drones

Groundcraft

BMW 2065 Mjöllnir (Racing Bike)
Racing bike with a sophisticated passenger safety system, making it popular with police and security services. An upgraded "security" variant with three additional points of Armor is available for 550 ¥ extra with Availability 8R, and has become quite popular among professional Combat Bikers.
Similar Models: Messerschmidt-Kawasaki Silberfalke, SuzukiKR1200 Rogue
Std. Upgrades: Passenger Protection 2

BMW Trollhammer (Chopper)
The Trollhammer truly delivers on the advertisement promise of "Tough bikes for tough people". Due to its robust construction, Metahuman Adaption for Trolls only costs 250 ¥ and takes up no modification slots.
Similar Models: Gaz-Niki Badger
Std. Upgrades: –

BMW RV430 (Sedan)
Currently the status symbol to have for young execs in the middle management.
Similar Models: Audi Signum L5, GMC Nitro

Std. Upgrades: Anti-Theft System, Amenities (Middle), Engine Customization (Speed), Armor (Concealed)

Eurocar President (Limo)
High-end limo. For an additional 12,500 ¥, the Eurocar President can be upgraded to Amenities (Luxury)
Similar Models: Rolls-Royce Phaeton (only Luxury version), Toyota Chiyoda
Std. Upgrades: Anti-Theft System, Amenities (High), Life Support 1, Engine Customization (Speed), Armor (Concealed)
Artwork

Mercedes IG310 Igel (ATV)
Has two additional modification slots, for a total of 14.
Similar Models: Leylan-Zil S-61e, GMC Crazy
Similar models are the same as for the Peugot 11e, this error already exists in the original
Std. Upgrades: Off-Road Suspension, 2 Additional Fuel Tanks

Peugot 11e ElectroCar (Subcompact)
Electric commuter car.
Similar Models: Leylan-Zil S-61e, GMC Crazy

Std. Upgrades: GridLink, Improved Economy

VW Lingus (Midsize Car)

Family car optimized for integration into the driver's PAN.
Similar Models: Mitsubishi Private CL, Opel Rubin
Std. Upgrades: Passenger Protection 2

Renault-Fiat 264 "Fattorina" (Delivery Van)

Not just used as delivery van, but also a cheap family van and general utility vehicle. Has two additional modification slots, for a total of 18.
Similar Models: EMC Serena, Ford Metrolis
Std. Upgrades: Passenger Protection 2

Scania VM 42 (Cargo Truck)

Most common version is built for standard ship containers, other versions are available, though.
Similar Models: Chrysler-Nissan Logan 26T, GMC Viking
Std. Upgrades: Amenities (Middle)

Military and Security Vehicles

Mercedes Multimog Greif (Command Vehicle)

Comes with an integrated MCT Sentinel Nexus (→ *Arsenal*).
Similar Models: Aztechnology Calp Ieh, UCAS A1170 Phalanx CV
Std. Upgrades: 2 Drone Racks (Small Landing), ECM 2, ECCM 2, Personal Armor 6, Life Support 1, Satellite Uplink, 2 Gun Ports

Mercedes PE Commando (Secure Delivery Van)

Since the sheer presence of the PE Commando is often enough to draw unwanted attention to its cargo, Mercedes offers a variety of faux frames to alter the body shape. Recognizing a Commando under this camouflage requires an Extended Logic + Automotive Mechanic (8, 1 Minute) Test or an Intuition + Perception (4) Test. Frames are custom made according to customer requirements and cost 6,500 ¥ with an Availability of 14R, however these modifications reduce the Acceleration to 15/35 and Speed to 135. Particularly cumbersome and/or complex frames may have a higher price/Availability, or reduce the vehicle's performance even further (GM fiat).
Similar Models: Dodge Red Wolf, Mitsubishi Mayjar
Std. Upgrades: Anti-Theft System, ECM 6, Fuzzy Logic, Life Support 1, Personal Armor 4, Armor (Concealed), Turbocharger 3

Ruhrmetall Wolf II (Wheeled APC)

An airmobile armored platform which may serve in a variety of roles such as APC, IFV, air defence, ambulance, or combat engineer vehicle. The stats given here are for the APC variant.
Similar Models: Nizhinyi Tagel Inc. BMP-052b Natadatel, Toyota-Singarms Kannka
Std. Upgrades: Off-Road Suspension, Personal Armor 6, Life Support 2, Smoke Generator, Rigger Adaption, 1 Additional Fuel Tank

Drones

Jena Robotnik Cyclone (Spy Microdrone)

Spy drone the size and shape of a Yo-Yo.
Similar Models: NeoNET Caracas, Renraku Jingo
Std. Upgrades: –
Artwork

Renraku Shrew (Disassemblable Spy Drone)

A drone the size of a tuna can, with four potrouding legs ending in wheels. Can be disassembled and put back together without any tools with an Extended Logic + Automotive Mechanic (6, 1 Minute) Test. The individual parts are shaped to look like typical contents of a businessman's luggage, recognizing them as something different requires an Logic + Automotive Mechanic (3) or Intuition + Automotive Mechanic (4) Test.
Similar Models: –
Std. Upgrades: Assembly Time Improvement

Ruhrmetall Wolfspinne (Arachnid Walker Drone)

One of the most modern and feared hunter drones on the market. Besides an intimidating effect, the spider-like exterior allows this drone to pass though surprisingly small spaces.
Similar Models: Aztechnology Alacrán, MCT Cora
Std. Upgrades: Pimped Ride 1 (Intimidating Looks), Walker Mode, Weapon Mount (External, Fixed, Remote), Targeting 3 and Defence 3 Autosofts

Augmentation

Cyberware Suites

Aztechnology Topo

While the corps usually do not care much about workplace safety, there are mines in places were using cheap and expendable labour just isn't an option. As several included components are normally illegal for civilian possession, legally obtaining the Topo (Mole) requires membership in a union for mining or construction workers.

Components:
    Thermographic Vision (Retinal Mod.) Xocotl L3 I
    Damper AZ Mk. I
    Plastic Bone Lacing Teyeyollotl A
    Internal Air Tank EVO Sigma
    Muscle Replacement R. 2 Mulo IV

Clockwerk Bright Cloud

Wuxia, the tales of journeying martial artists with superhuman abilities, have a long tradition in former China. Since the Awakening, some are lucky enough to be able to replicate such abilities. However, many others have to rely on cyberware to compensate for lacking magical talent, and Clockwerk caters to such needs.

Components:
    Balance Augmenter MCT Level One BA03
    Gastric Neurostimulator MCT SteadFast Sirius
    Retractable Climbing Claws Siegel S2
    Grip Feet bóuzi-K
    Balance Tail mao-K

Kalkulation von die Modifizierers

Bodytech introduces a small change to the Essence reduction of cyberware suites: The 10% reduction from a suite is **added** to reductions from a higher implant grade, meaning that the components of an Alpha-grade cyberware suite have their Essence cost reduced by 10% (cyberware suite) + 20% (Alphaware) = 30% .

As this also changes numbers for the existing suites, the table also lists the existing suites with their new Essence costs.

Note that both the Nuyen costs for cyberware suites and all other Essence and price modifiers are still multiplied. For example, the numbers in the example for used cyberware (→ p.32, Augmentation) remain unchanged in *Bodytech*.

Evo Aquanaut

Aimed at both professional and recreational divers, as well as everybody else who spends a lot of time in or under water.

Components:
    Orientation System Evo Globe 3

Image Link (Retinal Mod.) Cybersystems VA098c
Cyberfins Evo Marlin
OXSYS Cybergills Evo AF-3 Deep Blue
Internal Air Tank Evo O^3

NeoNET/Spin-X Sternschutz ZK Set

Sternschutz is one of the largest security providers in the AGS, and known for always utilizing the latest and best equipment – as well as for having few reservations about using said equipment, even more so with Metahumans at the receiving end.

This cyberware suite was custom developed for Sternschutz' problem solvers, the Zugriffskommandos (ZKs, "aussault squads").
Components:
    Headware Commlink Erika Eminence 8R. Use stats for Hermes Ikon (→ *SR4a, p. 328*)
    Smartlink (Retinal Mod.) Zeiss Artemis-B
    Datajack NeoNET GatOR
    Kevlar Bone Lacing SpinX Stonewall s419

Wired Reflexes R. 1 SpinX Cougar Pro
The Wired Reflexes are mostly likely supposed to be **Reaction Enhancers R. 1**, otherwise the Essence cost and price do not add up

Saeder-Krupp Signifier Prime

The Signifier Prime represents the baseline cybernetic equipment for all members of Saeder-Krupp's urban brawl team, the SK Centurions. Since the end of the 2070/71 season, it has been released for persons outside the Centurions, although legal buyers need to be licensed as professional athletes by the International Urban Combat Sport Union or a similar body.
Components:
    Nano-Biomonitor Shiawase HoliS x5
    Nanohive R. 3 Cyberdynamics Legio
    Dermal Sheath R. 2 Biogene TacSheath LD2
    Aluminium Bone Lacing DocWagon Unbreakable Mod. III
